```python
## Set-up logging ##
logFilename=os.path.dirname(os.path.realpath(__file__))+"/logs/"+str(time.strftime("%Y%m%d-
%H%M%S"))+".txt"

fid=open(logFilename,"w")    # Open and then close to create a new file
fid.close()

logging.basicConfig(filename=logFilename,level=logging.DEBUG,format='%(asctime)s %(name)s:%(levelname)s %
(message)s')
```
